

METAV 2014: KNUTH presents innovative metalworking technologies

For many international manufacturers and customers in the metalworking world, the META in Düsseldorf is the established industry event for more than 30 years. No other trade show offers this transparency and spectrum of a complete market metalworking market overview.

KNUTH's motto for the METAV 2014 is: Innovative Technologies Made by KNUTH

KNUTH is a leading supplier and one-stop source for machine tools. This year, we also would like to present our capacities as manufacturer of premium machine tools.

We will introduce the following machines at our booth:

- **Servoturn** and **Servomill** servo/conventional lathes and milling machines - A new generation of high-quality machine tools for workshops and production.
- **RSM 500** CNC Cylindrical Grinding Machine – Easy to program, flexible and productive. Ensures superior grinding precision and is ideal for series and small batch productions.
- **Hydro-Jet 1313** Water-jet Cutting System – Cost-effective solution offering all the advantages of this cutting process with maximum precision and quality. Also available as 5-axis version with angle error compensation.
- **X.mill 700 HS** High-Performance Machining Center – Our high-tech highlight featuring a mineral-casting frame.

Additionally, we will introduce the **CNC Training Initiative**, the CNC-Training Center BASIC program, which is a joint project of KNUTH and Siemens to teach CNC technology in theory and practice.

This impressive presentation will be completed by bestsellers, like

- the **Numturn 420** with Siemens 808 control
- the fully automated **ABS 300 NC** band saw
- and 2 universal milling machines and drill presses that are proven classics
